## A propos FMII

FMII is a real estate consulting company. We develop strategies to harmonise their facility management and capitalise on best practice. Imagine places where occupants are happy! From strategy to execution of services, we co-build functional and efficient environments with our clients. We create, manage and maintain environments that make their daily lives easier, more productive and more enjoyable. From strategy to execution, we co-build functional and efficient environments with our clients.

We create, manage and maintain environments that make their daily lives easier, more productive and more enjoyable.

## Our services

Advice to companies & shareholders  
Asset digitisation  
Multi-technical maintenance

Space rental & nomadism  
Security & cleanliness  
Service support

“We maintain the premises, where the occupants are happy”

### Asset digitisation

#### BIM & Facility Management

We support you in the creation and operation of your digital models according to BIM standards.  
Collecting, organising, enhancing and distributing data generated by the use of buildings.

Offer a single interoperable platform to collect and share all equipment data.  
Benefit from real-time indicators and alerts (CMMS).  
Analyse and compare operating performance and building usage quickly and use of buildings to provide the right services and advice.  
Exchange all useful information with owners.

“Digitize places to make the world work better”

### Be innovative in managing buildings with BIM & FM

A global and sustainable control at the service of your occupants and the performance of your sites, by integrating the latest technologies while respecting the strictest standards in terms of safety and hygiene.
