**Digital Ways For Construction**

## Key success factors

Solution implemented in 100 days.

Central data management.

Multi-dimensional BIM integration.

A turnkey solution for Design, Planning and Execution of construction works.

Cost control and forecasting.

Multi-level indicators in real time.

## Digi-Build

Digi-Build is an integrated turnkey solution for architecture, engineering and construction (AEC) firms.

Focused on construction project management, our solution allows you to manage all your processes related to design, planning, execution and operations in a collaborative environment.

By combining BIM data directly with the Primavera P6 planning tool and the SAP S/4 HANA integrated project management tool. We offer our customers a very high level of integration and interchangeability, as well as an agile, innovative and collaborative approach to project management.

"Our aim is to accelerate your digital transformation"

"Revolutionize the way construction projects are managed"
